Continuous Vulnerability Management (CVM)

Guide Star
A Division of CCI Systems

MANAGE CYBER RISK WITHOUT IMPACTING YOUR TIME, MONEY AND PEOPLE

We perform regular scans of your network which identifies vulnerabilities within your network servers and workstations.

Guide Star helps you put together a plan to remediate vulnerabilities using our resources.

We sit down with you and recommended a prioritized list of things you should go after.

Bringing Cyber Efficiency to Your Every Day

Discover
Perform regular deep scans of your data to uncover risks and unknown vulnerabilities

Understand
Classify, rank, prioritize and score your data to track efforts and stay organized

Mitigate
Assign accountability to data owners and remediate identified risks

Manage
Understand, measure progress, meet resolution deadlines, and set achievable goals
